(54) OVERLAPPING FILM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an overlapping film which does not become a source generating an organic harmful substance during being incinerated and shows a sufficient odor retaining effect, a sufficient anti-oxidation effect and a sufficient moisture proof effect.

SOLUTION: A gas barrier coating film made of an alkali metal polysilicate represented by $M2O.nSiO_2$ (M is lithium or a plurality of alkali metals including lithium; and n is within the range of 1 to 20 by a molar ratio) as a major component is laminated on a single surface or both surfaces of a base material made of a plastic material and further a heat sealable layer having a heat sealability is laminated on at least one of the outermost layers.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
